Nomenclature

SCC State compensation contribution

Monetary unit

Social spending is expressed in millions of Czech kronas (CZK).

General notes

The social protection system consists of the following three pillars:

- Social insurance programmes including statutory pension, sickness and employment insurance schemes;
- Income-tested State social subsidies that are granted under certain conditions;
- Means-tested social assistance support.

The individual country notes of the OECD Benefits and Wages (www.oecd.org/social/benefits-and-wages.htm) provide a comprehensive description of characteristics of social programmes (e.g. conditions for receipt, calculation of payment rates, tax treatment of social support, benefit duration, etc.) for the working-age population, including: unemployment insurance and assistance, social assistance, employment-conditional benefits, housing benefits, family benefits, childcare support, and support for sole parent households.

Break in series

Data for public expenditure are underestimated for 1990-91 because data for ALMP are not available for 1990 and data for "Other contingencies" are not available for 1990-91.

Data for Private health insurance before 2003 refer the total health spending function (HC1-HC9, HCR1) as the split in current health spending (HC1-HC9) into the financing schemes is only from 2003 on.

Secretariat estimates .

Childcare pre-primary expenditure is estimated for 2013 based on the average annual growth of 2010-2012. Adjustment for 6 years old in childcare pre-primary expenditure is estimated based on enrolment rates from the OECD Education Database.
