### Further notes

Official (ONS) GFCF statistics show a significant spike in 2005 for ISIC rev. 4 Division 24 (Manufacture of basic metals) offset by a significant drop for Division 84 (Public administration) believed to be a consequence of the reclassification of British Nuclear Fuels Ltd from the public sector to the private sector. For analytical purposes, in STAN, 2005-2006 current price and deflators series for Divisions 24 and 84 were smoothed using "spline interpolation" techniques. Corresponding higher aggregates were adjusted accordingly.
