**Nomenclature**

SSIF : State Social Insurance Fund

**Monetary unit:** In Millions Euro

**General notes**

The individual country notes of the OECD Benefits and Wages (www.oecd.org/els/social/workincentives) provide a comprehensive description of characteristics of social programmes (e.g. conditions for receipt, calculation of payment rates, tax treatment of social support, benefit duration, etc.) for the working-age population, including: unemployment insurance and assistance, social assistance, employment-conditional benefits, housing benefits, family benefits, childcare support, and support for sole parent households.

**Break in series**

Data for 1990 onwards are based on the new ESSPROS methodology format. Coherent spending series for 1980 onwards at the individual programme level were obtained on basis of information for a few years in the early 1990s for which both historical spending series and information based on the new ESSPROS format were available. For certain programmes and aggregate categories, breaks in series (between 1989 and 1990) were inevitable. In general, programmes from the old ESSPROS format which could not be matched with a figure from the new ESSPROS format were set to “missing” from 1990 onwards; similarly, figures from the new ESSPROS format which could not be matched to a programme from the old methodology were set to “missing” for the period 1980-89.

Data on public expenditure are underestimated for the period 1980-89 because data on public expenditure on ALMP are available only from 1990 onwards.

Health Data refer to OECD Health Data since 1988 and to estimates from 1988 backwards from previous national accounts health spending series.
