Cancer

Malignant neoplasms (C00-C97)
Malignant neoplasm of colon, rectum, rectosigmoid junction and anus (C18-C21)
Malignant neoplasm of trachea, bronchus and lung (C33-34)
Malignant neoplasm of female breast (C50)
Malignant neoplasm of cervix (C53)
Malignant neoplasm of prostate (C61)

Selected cancer incidence rates

The number of new cancer cases per 100 000 population. Rates have been standardised according to the World Standard Population, as proposed by Segi [1] and modified by Doll et al. [2].

Sources and Methods

Main data source: International Agency for Research on Cancer (IARC).
Sources:
GLOBOCAN Database:
- 2012: Data available for all countries (accessed on May 23rd, 2015).
- 2008: Data available for all countries.
- 2002: Data available for all countries except Estonia, Chile, Israel and Slovenia.

EUCAN Database:
- 2000: Data available only for some European countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.
- 1998: Data available only for some European countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, and the United Kingdom.

Please note that because the sources of data are continuously improving in quality and extent, estimates may not be truly comparable over time. The observed differences may be the result of a change in methodology and should not be interpreted as a time trend effect.
