

OECD Health Statistics 2023

Definitions, Sources and Methods

Fertility

The Total Fertility Rate (TFR) is defined as the average number of children born per woman over a lifetime given current age-specific fertility rates and assuming no female mortality during reproductive years.

Sources and Methods

Source: OECD Family database, Indicator FAM1, <http://stats.oecd.org/Index.aspx?DataSetCode=FAMILY>.

Data extracted 25 May 2023.

Data come mostly from national statistical offices and other international organisations (e.g. Eurostat and the World Bank).

Further information: http://www.oecd.org/els/family/SF_2_1_Fertility_rates.pdf.

Israel

Note: The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

NON-OECD ECONOMIES

Russian Federation

Note: This document, as well as any data and any map included herein, are without prejudice to the status of or sovereignty over any territory, to the delimitation of international frontiers and boundaries and to the name of any territory, city or area.
