## Monetary unit

Social spending is expressed in millions of Euros (EUR).

#### **General notes**

The Ministry of Labour and Solidarity supervises the operation of the Portuguese system of social protection. The general scheme for employees and self employed workers does not cover civil servants or lawyers and barristers who are covered by special schemes.

The general scheme is administered by the five regional social security centres, responsible for sickness (cash benefits), maternity, unemployment, family benefits and the non-contributory scheme; National Pensions Centre in charge protection coverage in the event of invalidity, old-age and death; National Centre for the Protection against Occupational Risks in charge of protection coverage in the event of an occupational disease.

The individual country notes of the OECD tax-benefit model (<u>How do countries calculate tax</u> <u>liabilities and social benefit entitlements?</u> | <u>OECD</u>) provide a comprehensive description of characteristics of social programmes (e.g. conditions for receipt, calculation of payment rates, tax treatment of social support, benefit duration, etc.) for the working-age population, including: unemployment insurance and assistance, social assistance, employment-conditional benefits, housing benefits, family benefits, childcare support, and support for sole parent households.

#### Break in series:

Data for 1990 onwards are based on the new ESSPROS methodology format. Coherent spending series for 1980 onwards at the individual programme level were obtained on basis of information for a few years in the early 1990s for which both historical spending series and information based on the new ESSPROS format were available. For certain programmes and aggregate categories, breaks in series (between 1989 and 1990) were inevitable. In general, programmes from the old ESSPROS format which could not be matched with a figure from the new ESSPROS format were set to "missing" from 1990 onwards; similarly, figures from the new ESSPROS format which could not be matched to a programme from the old methodology were set to "missing" for the period 1980-89.

# Secretariat estimates:

The split between public and private social expenditures is not available since 2010. These were estimated by using the 2009 proportion of public and private social expenditures in total social expenditures.
