Table 1. Territorial levels for statistics and indicators	6
---	---

Introduction

This document presents the maps of the territorial levels of Member countries used in the OECD classification and presented in the OECD Regional database (<http://stats.oecd.org>), which contains statistical information at sub-national territorial level for all OECD countries. It currently encompasses yearly time-series for around 80 indicators of demography, economic accounts, labour market, education, social and innovation themes.

Territorial level classification

In any analytical study conducted at sub-national levels, the choice of the territorial unit is of prime importance. Regions within the 38 OECD countries are classified on two territorial levels reflecting the administrative organisation of countries. The 433 OECD large (TL2) regions represent the first administrative tier of subnational government, for example, the Ontario Province in Canada. The 2 414 OECD small (TL3) regions correspond to administrative regions, with the exception of Australia, Canada, Latvia and the United States. These TL3 regions are contained in a TL2 region, with the exception of the United States for which the Economic Areas cross the States' borders. For Costa Rica, Israel and New Zealand, TL3 level is equivalent to TL2. All the regions are defined within national borders (See Table 2 for the regional classification of each country).

This classification – which, for European countries, is largely consistent with the Eurostat NUTS 2021 – facilitates greater comparability of geographic units at the same territorial level. Indeed, these two levels, which are officially established and relatively stable in all member countries, are used as a framework for implementing regional policies in most countries.

Non official grids

Due to limited data availability, labour market indicators in Canada are presented for groups of TL3 regions. Since these groups are not part of the OECD official territorial grids, for the sake of simplicity they are labelled as ‘non-official grids’ (NOGs) in this publication and compared with TL3 in the other countries. Germany has also a NOG category with the 96 Spatial Planning Regions, an intermediary level between the 16 Länder (TL2) and the 402 Kreise (TL3). The German NOG allows for a level of spatial disaggregation comparable to the other countries. The French NOG corresponds to the definitions of regions before the territorial reform of 2015.

‘Macro-regions’ are a higher level of aggregation of TL2. These macro-regions can be an alternative to presenting sub-national information, when data at lower levels are not available or cannot be produced. For EU countries, these regions are consistent with the NUTS1. However, the use of those macro regions should be a second best because they have no administrative function and economic policies are therefore less likely to be formulated at this territorial level, but they can be a first step to grab territorial disparities.

The complete list of regions by is available in [excel](#) on OECD .Stat, along with the information on territorial typologies.

Summary of changes:

November 2023: change from “Czech Republic” to “Czechia” // March 2023: list of macro-regions is added (non-official territories). January 2022: update reflects the changes in 2021 NUTS classification (Source: [Eurostat](#)) ; Colombia: update of TL3 regions (subregions); // August 2021: update of the map of

Japan // October 2020: addition of Colombian TL2 regions // March 2020: change in Chilean regions, with one additional TL2 region: Ñuble (CL16). This region was previously included in Biobío (CL08) as a TL3 under the code CL083. This new TL2 region has three TL3 new regions: Diguillín (CL161), Itata (CL162), Punilla (CL163) // September 2018: update reflects the changes in 2016 NUTS classification (Source: [Eurostat](#)) // December 2024: correction of regional names in Poland.

Map sources

EU countries	Including Norway, Switzerland and Turkey. GISCO - Eurostat (European Commission) Administrative boundaries: © EuroGeographics © UN-FAO © Turkstat
Australia	ABS 1270.0.55.001 - Australian Statistical Geography Standard (ASGS), Statistical Area Level 4 (SA4) ASGS Ed 2021 Digital Boundaries
Canada	Statistics Canada, Catalogue no. 92-160-G, 2016 Census - Boundary files
Chile	Congress library (biblioteca del Congreso Nacional de Chile)
Colombia	DANE Geoportal
Japan	Ministry of Land, Infrastructure, Transport and Tourism
United States	Census Bureau, 2015 Cartographic Boundary Shapefiles - Counties
Other OECD countries	National Statistical Offices

Maps' borders have been smoothed (generalised) by the Secretariat to obtain a simplified version; as a result, some small areas may be excluded from the maps.

Map symbols

	This symbol in the maps identifies two different spaces that belong to the same TL3 region and therefore share the same regional code. The regional code is close to the circle within the first space, whilst the line points in the second space.
	Grey areas surrounding several spaces that belong to one region, either TL2, either TL3. These grey areas are geographically placed with a scale that is consistent with the other parts of the maps.
	Square areas represent a specific part of the country, either a zoom on a specific area, either a remote area.
Codification	The regional codes displayed on the maps can be truncated from their first digits for better legibility. The regional codes used in the OECD Regional database are presented in full in the tables below the maps.

Disclaimers

This document, as well as any data and any map included herein, are without prejudice to the status of or sovereignty over any territory, to the delimitation of international frontiers and boundaries and to the name of any territory, city or area.

The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.
